

# Truck-Mount VMS

## Full-Matrix Signs for Small Trucks

# Compact design is highly legible and energy efficient

- Full-matrix message signs available in two sizes
- Touchscreen controller
- Multiple fonts and preprogrammed graphics
- Preprogrammed extra-bold arrows
- Travel height under 14 inches

Wanco’s Small-Truck Message Signs feature high-efficiency LEDs for superior performance and outstanding legibility.

The full-matrix display can present messages as text, graphics or both. Messages are bright, easily visible and highly legible. Two sign sizes are available.

Common applications include road striping convoys, pothole repairs, snow removal, road sweeping and crash cushion (TMA) trucks.

For ease of use, Wanco’s full-color touchscreen controller is redesigned for truck-mount applications, with most common functions available directly from the home screen. The controller installs inside the cab for easy access.

An integrated 90-degree tilt-frame raises and lowers the sign using an electric actuator, operated from the touchscreen controller. In travel position, the sign and compact frame are under 14 inches in height.

To see or order the Wanco Small-Truck Message Signs, call **800.972.0755** or visit **wanco.com**.
