V3 SET-UP

### COMPACT KIT WITH MINIMAL PARTS

**Total weight: 1,408 lbs**

Unit fits securely into a compact storage kit, making it incredibly easy + convenient to store and transport.

**6** Heavy and long connecting tubes [V3]

**12** Standard connecting tubes [V2]

**2** Spanners

**14** Modules

**12** Plugs [V2]

**2** Ends [V3]

**4** Ends [V2]

**14** Wheels

### QUICK + SIMPLE

Remarkably fast assembly/disassembly process requires only one person. With a fast 14-minute setup, Block Axess can be deployed without the need for extensive manpower or time-consuming processes.

### VERSATILE + CUSTOMIZABLE

Modular design allows for various sizes by simply adding components. The customizable laser-etched plates enable you to incorporate your city, event, or company's name to fit your needs.

### HIGHLY SECURE

Constructed from thick, galvanized steel, Block Axess provides robust security. Its tamper-proof assembly and disassembly requires specialized tools, ensuring that the security can't be compromised.

Engineered Products for Safer Highways

## CERTIFICATIONS

V3 is certified against

**ASTM F2656 - M30/P3**

to resist vehicles up to  
7.5 tons at 30 MPH

V2 is certified against

**ASTM F2656 - FS30/P3**

to resist vehicles up to  
3.5 tons at 30 MPH

Also certified to:

**IWA14-1**

**PAS68**

## ADA RAMP

Expand the accessibility of the Block Axxess with the use of the optional ADA disability ramp. The ramp folds neatly in half when not in use, for convenient storage and transport.

## NEVER MISS AN IMPACT

**Block Axxess comes with the Sentinel  
included + one year of free monitoring**

The Sentinel™ Impact Tracker allows you to get immediate notification of an impact to the Block Axxess. Deploy your repair team immediately and avoid any secondary impact tragedies.

01

### CONNECT

Connect to all types of crash cushions, attenuators, or other roadside devices with ease.

02

### MONITOR

Monitor the status of your crash cushion with a simple, easy to use interface from any device.

03

### IMPACT

The Sentinel transmits a signal upon an impact, alerting maintenance personnel.

04

### ALERT

An alert is sent to multiple devices with the exact location of the impacted crash cushions.
