THE CROC DIFFERENCE

CRASH CROCs are built to the highest standard of quality. Our trucks are designed by our team of engineers to provide the highest level of protection available.

ENGINEER-CERTIFIED UPFIT

Our engineer certified ballast system ensures proper performance during an impact.

ENGINEERED WIRING INSTALLATION

All wiring is installed per a pre-engineered wiring diagram with all wiring encased in loom and ran through pre-fabricated openings in bed.

BACKUP CAMERAS

Standard 2-camera system with monitor for use when attenuator is stowed or deployed

HEAVY-DUTY STEEL BODY & HEADACHE RACK

Heavy-duty welded steel body and Headache rack

CONNECTED ARROW BOARD

Transmits work zone location data to approaching motorists

TRAFFIX SCORPION II MASH ATTENUATOR

The Scorpion II is MASH Tested and Eligible with a minimum host truck vehicle weight of only 15,000 lbs (6,804 kg) with absolutely no upper weight limit.

WORK BASKETS

Bolt in engineered work baskets with LED step lights, drain holes, deck opening lid with latch and safety tie-off point

STAKE RAILS WITH SWINGING GATES

36" heavy duty stake rails with spring loaded latches for securing when open and closed for travel. Rails are secured in engineered bed pockets and bolted in place for easy removal
